Quick Talks on Equity ~ (#QTETL)

TODOS has been offering online PD for teachers since 2010. To continue presenting online PD to educators, TODOS proudly introduces *Quick Talks on Equity* (QTE). “Cuties” (QTE) blend our *Content Blasts* and *Brief Chats with Powerful Resources*. The talks will cover a range of topics that address both research and practice of equity related issues that arise in K-20 mathematics education. QTE’s interactions will occur synchronously and asynchronously.

- Sessions will be short and focused.
 - 15 minutes
 - Split between a “talk at” like a TED talk and Q&A.
- These webinars will be recorded and rebroadcasted for wider distribution.
 - The initial session will allow for synchronous interactions. The presenter will address questions submitted to the question folder as time permits.
 - The link to the recording of the session will be made available through social media and a twitter chat using #QTETL will provide asynchronous interactivity.
- Sessions will begin ON TIME!
 - Due to the short nature of QTE it is imperative that sessions begin on time.
 - The formal session will end after 15 minutes but participants and facilitators may choose to continue.

Please contact todosonline@todos-math.org with suggestions, questions, etc.

TODOS looks forward to your participation.
